

Social Skills Groups

Does your child need to improve their social skills?
Do they have trouble interacting with others?
Can they be aggressive, shy, or are they involved in bullying?

Perhaps a Social Skills group would be appropriate for them!

Applied Therapies & Wellness Center periodically runs these groups in four-week increments, one appointment per week. Each one-hour session has a different theme, such as 'Respect,' 'Meeting New People,' 'Preventing Bullying,' 'Making Good Decisions,' or other such themes.

We typically have one group for 4-6 year olds, and another for 7-10 year olds. These groups are not insurance-billable. Please contact ATWC for information on current Social Skills groups being run, and current pricing.
